National Register of Historic Places  
Registration Form  

This form is for use in nominating or requesting determinations of eligibility for individual properties or districts. See instructions in Guidelines for Completing National Register Forms. Complete each item by marking "x" in the appropriate box or by entering the requested information. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, styles, materials, and areas of significance, enter only the categories and subcategories listed in the instructions. For additional space use continuation sheets (Form 10-900a). Type all entries.  

1. Name of Property  

| historic name | NA |  
| other names/site number | Steiner Rowhouse #1 (D009:0122-053) |  

2. Location  

| street & number | 638-40-42 South 19th Street | N/A not for publication |  
| city, town | Omaha | N/A vicinity |  
| state | Nebraska | code | NE | county | Douglas | code | 055 | zip code | 68102 |  

3. Classification  

| Ownership of Property | Category of Property | Number of Resources within Property |  
| X private | X building(s) | Contributing | 1 | Noncontributing | buildings |  
| public-local | district | 0 | sites | |  
| public-State | site | 0 | structures | |  
| public-Federal | structure | 0 | objects | |  
| | object | 1 | Total | |  

Name of related multiple property listing: N/A  
Number of contributing resources previously listed in the National Register: 0  

4. State/Federal Agency Certification  

As the designated authority under the National Historic Preservation Act of 1966, as amended, I hereby certify that this X nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property X meets □ does not meet the National Register criteria. □ See continuation sheet.

Date of Action
The Steiner Rowhouse #1 was built in 1909 near the edge of downtown Omaha as a three-unit rowhouse structure. The simply detailed two-story brick building exemplifies the rowhouse property type formally and functionally, and exhibits elements associated with the early twentieth century Renaissance Revival style. A certified historic rehabilitation of the property for use as apartments is currently underway.

Constructed in 1909, this three-unit rowhouse is situated on a hill just south of Omaha’s central business district. Building permit information indicates that the structure was built by Joseph Kettnacker for Dr. H. F. Steiner. Although not listed on the permit, it is likely that the architect was Joseph Guth, as Guth is known to be the designer of a nearly identical structure built by Kettnacker for Steiner adjacent to this building two years later.

The two-story, flat-roofed, brick structure is rectangular in plan and measures approximately 60 feet along the street side by 30 feet deep. Functionally, the building consists of three attached dwelling units, each divided from its neighbor by a solid-masonry, load-bearing party wall in the standard rowhouse configuration. Each unit is accessed by a door on the street-side and a door at the rear. An interior stair near the front entrance of each unit leads to the second floor.

Two one-story porches with square brick columns and low-pitched hipped roofs shelter the buildings entrances. Situated on a corner lot, the two street-facing elevations feature simple details that are generally associated with the Renaissance Revival style. Limestone and corbelled brick form a cornice just below the building’s parapet. Brick of a contrasting color is used to form a belt course that links the segmentally-arched second story windows. Corners of the second-floor windows are highlighted with limestone trim, which is also employed for coping, sills and the enlarged keystones of the round-arched porch grilles. A turret marks the corner of the structure. Wooden

\[\text{See continuation sheet}\]
double-hung windows are used throughout, most with their original 12 over 1 configuration.
The Steiner Rowhouse #1 -- significant under Criterion C, architecture -- embodies the distinctive characteristics of a property type important in Omaha history, the rowhouse. A popular form of multi-family housing in the late nineteenth and early twentieth centuries, the rowhouse has been identified as a notable multiple-dwelling type associated with the historic context topic "Dwelling in Dispersed and Clustered Settlement" in the Nebraska Cultural Resource Plan, the principal preservation planning document for the state.

As the largest metropolitan area in Nebraska, Omaha contains the greatest number and variety of rowhouses in the state. "Rowhouses in Omaha", a property type analysis report based on a sample of 110 surveyed structures, defines several rowhouse formal types and related general eras of stylistic influence. Steiner Rowhouse #1 exemplifies one of six specific formal sub-types identified in the report (3- to 8-unit rowhouse structures aligned parallel to the street) and it represents one of three distinct stylistic periods outlined, specifically the influence of the Renaissance Revival style as applied to rowhouses built in Omaha between 1900 and 1915.

The primary incidence of rowhouse construction in Omaha coincides closely with two periods of economic boom in the city--the first from approximately 1886 to 1890 and the second during much of the first quarter of the twentieth century. Both periods saw tremendous growth in commerce, industry, population and construction accompanied by a critical need for housing of various types. The rowhouse type of multi-family dwelling was utilized extensively during both boom periods.

The basic component of the rowhouse in Omaha is a one to three

*See continuation sheet*
story single-family dwelling unit of simple rectangular massing most generally sheltered by a flat roof concealed by a parapet. Individual units from the late 1880's and early 1890's range in size from 22 to 24 feet wide by 35 to 40 feet deep and are slightly larger than those built after the turn-of-the-century. Rowhouse units were combined in a number of ways, from groups of two to eight aligned parallel to the street, to units arranged around landscaped courts in L-shaped and U-shaped configurations, to rowhouse complexes. Generally, the entrance to each rowhouse is defined by either a one-story porch or a simple canopy.

Stylistically, rowhouses fall into three general categories related to specific time periods. Late 19th century rowhouses primarily exhibit elements of one or more of the following styles: Italianate, Eastlake, Richardsonian Romanesque, and Queen Anne. Of the post-1900 rowhouses surveyed, the vast majority built between 1900 and 1915 were designed, in varying degree, in the Renaissance Revival style or in some way exhibit its influence. Rowhouses that date from the period 1916 to 1927 predominately exhibit elements of the Prairie, Arts & Crafts and Spanish Colonial Revival styles.

The registration requirements outlined in the property type analysis for rowhouses in Omaha indicates that rowhouses considered for the National Register should be compared with rowhouses of the same formal type and stylistic influence, utilizing the categories in the report as a guide. The 3-unit Steiner Rowhouse #1 is comparable to seven other surveyed structures. All are rowhouses comprised of between 3 and 8 units aligned parallel to the street (comparable formal type), and all were built between 1900 and 1915 and exhibit Renaissance Revival style elements to some degree (comparable era and stylistic influence).

Although the seven comparable rowhouses are essentially the same form, the extent to which they display the influence of the Renaissance Revival style varies. Two structures, as originally designed, are more elaborate than the Steiner Rowhouse #1, two are simpler and three are very similar in level of detail. While the Steiner Rowhouse #1 is not the most elaborate structure in its comparison group, it is nevertheless a good representative of its particular formal type and stylistic period, particularly
since it retains a higher degree of integrity than the more elaborate structures with which it was compared.

The Steiner Rowhouse #1, built at the height of the post-1900 boom period in Omaha, exhibits all requisite elements, as outlined in the property type analysis "Rowhouses in Omaha", of a specific rowhouse sub-type in its historical associations, massing, configuration, style and construction. It retains integrity of location, design, setting, workmanship and feeling, and retains a high percentage of its original materials. Of the seven comparable rowhouses, two have a higher degree of integrity than the Steiner Rowhouse #1, two have a lesser degree, and three have approximately the same level of integrity.

The registration requirements outlined in the property type analysis report on rowhouses suggests that each of the several rowhouse configurations and stylistic trends described in the report should be represented in the National Register in order to best portray the evolution of the type in Omaha. Presently, only one Omaha rowhouse (of nearly 200 surveyed structures) is listed in the Register, representative of a different era and stylistic period than the Steiner Rowhouse #1. The Steiner Rowhouse #1, and an adjacent structure, the Steiner Rowhouse #2 (which is being nominated separately) are the first two rowhouses of their particular sub-type to be nominated.
